Inspiring Motion
Since 1988

ExtrlQ Line

Servo Drives that Endure “Any Environment”

Extreme durability, meticulous power management and high precision of movement are essential attributes for developing high performance reliable industrial, commercial or military applications.

Elmo's ExtrlQ is a standard “off the shelf” series of robust motion control products designed, verified, manufactured and tested for applications operating under extreme environmental conditions, such as: expanded temperature ranges, high humidity, extreme altitude, intense vibration and high mechanical shock. In addition to enduring the most extreme environment the ExtrlQ exhibits top servo performance, super compact sizes, high efficiency, negligible EMI, High Reliability and answering any servo requirement. The durability is verified by the most severe Environmental, EMC and Safety Standards.

Motion Controllers
Ready for the Extreme

Motion Control Solutions
for Any Mission, Any Environment

Environmental Specifications

Our high performance field tested solutions withstand the most extreme environmental conditions like heat, cold, freeze, humidity, dryness and wind. They comply with the strictest safety, EMC, Electrical, Reliability and Environmental Standards such as 1275, 704, 1399, 810, 461, 217, UL 61800-5-1, IEC 61800-5-2(SIL3), IEC 60068-2, IEC 61800-3, and more.

Feature	Operating Conditions	Range
Ambient Temperature Range	Non-operating conditions	-50 °C to 100 °C (-58 °F to 212 °F)
	Operating conditions	-40 °C to 70 °C (-40 °F to 160 °F)
Temperature Shock	Non-operating conditions	-40 °C to 70 °C (-40 °F to 160 °F) within 3 minutes
Altitude	Non-operating conditions	Unlimited
	Operating conditions	-400 m to 10,000 m (-1,300 ft to 32,800 ft) Models for higher altitudes are available upon request
Relative Humidity	Non-operating conditions	Up to 95% relative humidity non-condensing at 35 °C (95 °F)
	Operating conditions	Up to 95% relative humidity non-condensing at 25 °C (77 °F) Up to 90% relative humidity non-condensing at 42 °C (108 °F)
Vibration	Operating conditions	20 Hz to 2 kHz, 14.6 g
Mechanical Shock	Non-operating conditions	±40 g; Half sine, 11 msec
	Operating conditions	±20 g; Half sine, 11 msec

Rugged Servo Drives

Elmo's Lion Family

Motion In Perfect Harmony

Elmo's Lion series of motion controllers provides the optimum solution for fast, simple, and unequalled machine operation. The Lion family, featuring world class multi-axis capabilities, are loaded with extreme processing power, memory resources, advanced motion algorithms, and complex scenarios.

These state of the art machine motion controllers combine advanced machine functionalities and most efficient network mastery. Maestros create a perfectly synchronized motion symphony when combined with Elmo's intelligent servo drives, delivering an unbeatable performance using the built-in advanced control algorithms and features of Elmo's powerful perfectly tuned drives.

As well as providing fast and efficient machine motion with cycle times down to $250\mu\text{s}$, The Lion also master other machine functions using standardized EtherCAT networking for best integration with the widest variety of machine peripherals like I/Os, HMI, vision and more.

Lions are designed to significantly extend and enhance motion control, connectivity, performance and ease of the use. In addition to best results they provide "Cost Cutting by Technology" with easy and cost effective integration thanks to reduced hardware and less cabling.

ExtriQ Lion

Multi Axis Network Motion Controller for Extreme Environments

“Design Your Own Extreme Motion Control Solution”

Elmo's Gold Lion is an advanced network based, multi-axis machine motion controller. The Gold Lion can control any multi axis scenario. From simple Point-To-Point to complete multi-axis coordinated / synchronized motion. The Gold Lion Module is a “ready to use” complete motion controller to be embedded in user's printed board, resulting high level of customization, most advance motion solution with tremendous design flexibility, richness of functionalities and huge space saving.

- Controls up to 100 axes with a high-level of synchronization and accuracy
- Reverse Kinematics Support
- Motion blending and superimposed motion
- Coordinated group motion, blending and transitions
- Polynomial motion segments, PVT and Spline support
- Real-time updates of target positions (“flying vision™”)
- 1D, 2D and 3D error correction
- EtherCAT master for distributed networking, with distributed clock management
- CANopen master for distributed networking
- Host communications and protocols:
 - Ethernet, TCP/IP, UDP (Fast Binary Protocols, Modbus, Ethernet/IP)
 - USB 2.0
- Rich, high-level, multi-axis programming environment:
 - Microsoft .NET
 - IEC 61131-3, PLCopen
 - Native C/C++ programming using the PLCopen for Motion
 - Win32 C/C++

EASII Elmo Application Studio II Software

Motion without programming Only with Elmo's Advanced tools

System implementation using innovative EASII (Elmo application Studio) software including Elmo Motion Function Blocks, EMBLs, ushers in the "Intelligence by Simplicity" revolution. Motion programming was once the domain of hard to find motion "wizards", demanding both the highest level of machine motion skills with expertise in motion programming. Now using EASII with EMBLs you can get the best performance from your machine, fast to learn how, easy to implement, by non-wizards, significantly shortening "Time to Market" while enormously saving on engineering resources.

Walking You Through the Entire Motion implementation

EASII, Elmo Motion Control's leading motion control software, offers an intuitive interface to simplify complex advanced motion programming. EASII configures, programs, maintains, monitors and analyzes every feature and capability of Elmo's servo drives and Maestro motion controllers. It brings your machine to peak performance in the shortest time, makes drive setup simpler and puts powerful, intuitive software tools for motion control at your fingertips, regardless of the complexity of the application.

EASII includes intelligent, simple to use Elmo Motion Block Libraries (EMBLs), machine templates, function, and capabilities which operate in a wide variety of high-level, multi-axis programming environments such as Microsoft .NET, IEC 61131-3 PLCopen, Native C/C++ programming using the PLCopen for Motion and Win32 C/C++.

The EASII with EMBLs are indeed "One Tool That Does it All " providing Configuration, Set-Up, Networking, Programming, Tuning, Load Identification, Multi-dimensional Control Optimization, Synchronization, Motion Blending and Transitions, Error mapping, ECAM, Gain Scheduling, Testing, Monitoring, and Recording.

- Innovative software tools enable motion control in every field - any application!
- User unit support, error mapping and correction, drive feedback emulation
- Maestro controller and servo drive ECAM configuration, with simplified external reference input processing, bode & Nichols tuning graphical analysis
- Management (upload/download) of numerous servo drive configurations
- Automated recording live scope and gauge displays
- Comprehensive inline help system

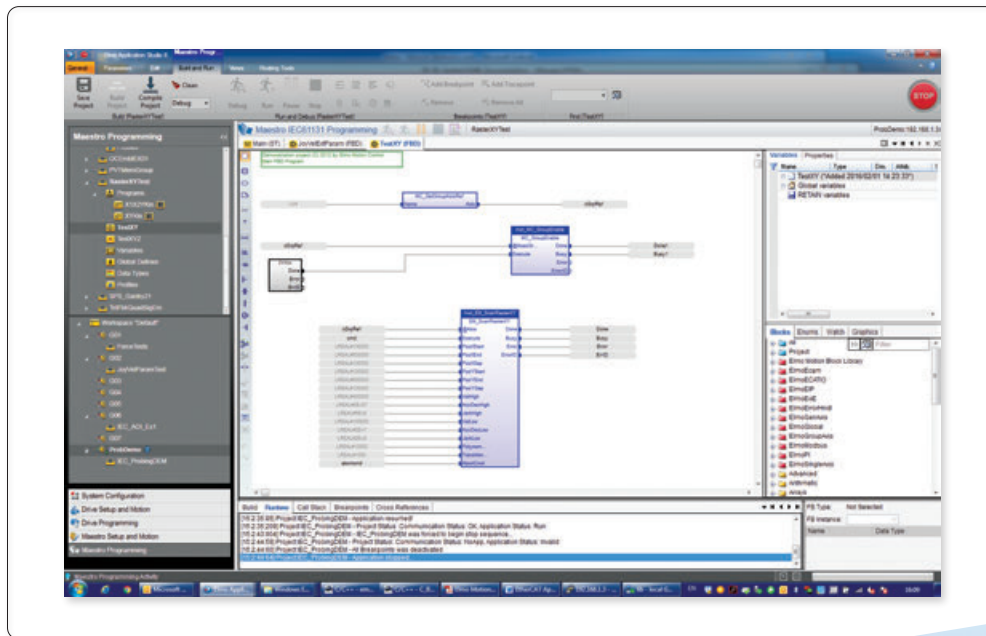

EASII
Elmo Application Studio

The advanced wizard-based
Application Studio II

EMBLs Faster, Simpler Implementation

EASII's ready to use motion function blocks, EMBLs, significantly simplify the development process of the application in the fastest speed. EMBLs are Elmo has developed numerous EMBLs that simplify the development process of the machine, for example Homing (all DS-402 methods and more), Output Compare (PEGS), Emulation, ECAM, PVT, Splines, Joystick, Position-To-Force, Raster Scan, Group Motion & Kinematics and more.

Drag and drop an EMBL on to project from the library. Define input and outputs, then execute. As easy as that!

Saving you time by
keeping it simple

ExtriQ Gold Servo Capabilities

Reliable and Rugged high performance Servo Drives with a high bandwidth to receive best results for any Servo load, even for the most demanding non-linear mechanics.

- Best results with any servo mechanism, whether high resonance, high inertia, wide bandwidth, very low speed, non-linear. Ultimate tuning tools, accomplishing top performance “Fast & Easy”
- Down to 50µs sampling rate
- “1:1:1” technology, same sample time for current, velocity and position loops resulting very fast and wide bandwidths
- High servo loop bandwidth, as high as 4.5KHz current loop Bandwidth
- Very High linearity, current dynamic range of 2000:1 (100A drive runs smoothly 0.05A load)
- Supports Any “known” Feedback sensor and any combination of Dual Loop sensors
- Mastering Gantry by only 2 Gold Drives, No need for additional bulky controller
- “By The Book” Standard EtherCAT and CANopen networking
- Abundance of control features:
 - ECAM
 - Output Compare
 - Master-Slave Follower
 - Modulo
 - Dynamic Braking
 - Dual Loop
 - Gantry
 - Planar
 - 1D error correction
 - Unlimited Control Numerical values
- Utmost efficiency of 99%
- Ultra High Current Technology
- Certified STO (Safety Torque Off), IEC 61800-5-2 SIL 3, EN ISO 13849-1 Cat 3, PL e
- Proven reliability of MTBF > 1,000,000 Hours

Gold Bee

The NANO servo drive that delivers over 4,000 "qualitative" watts

- Ready for the Extreme, -40 °C to +70 °C, Vibrations up to 14 GRMS
- Rugged to endure any environment
- Ultra High Current, 50 A at 100 VDC
- Advanced Servo capabilities for Best results with any load

ExtrIQ, SimplIQ Servo Drives

Leader since 2004, Field proven for High reliability and Top Servo performance.

Elmo's servo drives combine high power density, intelligent functionality and extreme environment durability.

The drives integrate Elmo's advanced, SimplIQ motion control core technology, which enables superior control performance.

ExtrIQ SimplIQ Servo Highlights

Elmo SimplIQ Core servo drive exhibit richness of capabilities and features supporting large variety of applications requiring harsh environmental conditions.

- Field Proven performance, quality and reliability since 2004
- High performance servo control
- Down to 50µs sampling rate
- High servo loop bandwidth, as high as 2KHz current loop Bandwidth
- Supports large variety of feedback sensors
- "By The Book" Standard CANopen networking (DS402, DS303)
- RS232 communication
- Abundance of control features:
 - ECAM
 - Smart position follower
 - Pulse and Direction
 - Output Compare
 - Master-Slave Follower
 - PT and PVT position and velocity operating modes
 - Modulo
 - Dynamic Braking
 - Dual Loop
- Utmost efficiency of 99%
- Ultra High Current Technology
- Proven reliability of MTBF > 1,000,000 Hours

About Us

Elmo develops and manufactures cutting-edge servo drives and network motion controllers that are one-stop solutions for any motion control technology. As a leading global company with millions of servo drives in operation, we have over 25 years of proven experience bringing our customers profitability and success. With a focus on highest performance, efficiency, reliability, safety, ease-of-use and compliance to standards, Elmo's solutions are chosen by leading machine manufacturers in nearly every industry around the world.

About Elmo Quick Facts:

- Established in 1988
- Elmo global presence: China, Germany, Israel, Italy, Korea, Poland, USA
- Over 3,000,000 servo drives installed and operating globally
- Worldwide sales and support network
